

Conforms to HCS 2012 – United States

SAFETY DATA SHEET

Elemental Fertilizer – Sugar Flush

SECTION 1 - IDENTIFICATION OF PREPARATION

PRODUCT IDENTITY : Sugar Flush
APPLICATION : Plant Mineral Supplement
RESTRICTIONS : Professional use only
COMPANY IDENTITY : GREEN AIR PRODUCTS LLC
COMPANY ADDRESS : GREEN AIR PRODUCTS LLC
:PO BOX 1410
: BORING, OR 97009
COMPANY PHONE : 503-663-2000
EMERGENCY 24HR PHONE : **CHEMTREC:** 1-800-424-9300 USA

SECTION 2 - COMPOSITION/INFORMATION ON INGREDIENTS

Chemical characterization : Solute in water
Chemical composition : MAGNESIUM SULFATE HEPTAHYDRATE - CEREOSE – SODIUM BENZONATE
CITRIC ACID
Chemical Information : CAS No.: 10034-99-8
OSHA-PEL: none established
ACGIH-TLV: none established
NIOSH-REL: none established

SECTION 3 - HAZARD IDENTIFICATION

OSHA/HCS status : While this material is not considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200), this SDS contains valuable information critical to the safe

handling and proper use of the product. This SDS should be retained and available for employees and other users of this product.

Classification of the substance or mixture

:

GHS label elements

Hazard Pictograms :

Signal word : Warning

Hazard statements : Causes eye irritation

Precautionary statements

Prevention : P280 - Wear eye or face protection. P264 - Wash hands thoroughly after handling.

Response : P305 + P351 + P338 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. P337 + P313 - If eye irritation persists: Get medical attention.

Storage : Not applicable

Disposal : Not applicable

Hazards not otherwise classified (HNOC)

: None known.

SECTION 4 - FIRST AID MEASURES

Eye contact : Irrigate thoroughly with water. If discomfort persists, obtain medical attention.

Ingestion : Wash out mouth thoroughly with water. In severe cases obtain medical attention. Do not induce vomiting

Inhalation : N/A

Skin contact : Wash off thoroughly with water & soap

Note to Physician :

SECTION 5 – FIRE FIGHTING MEASURES

Extinguishable media : Use an extinguishing agent suitable for the surrounding fire.

Unsuitable extinguishing media : None known

Fire extinguisher : N/A

Special fire fighting precautions: None

Hazardous Decomposition Materials

:

SECTION 6 – ACCIDENTAL RELEASE MEASURES

In case of accidental spill or release. Personal precautions equipment and emergency procedures

For non-emergency personnel : No action shall be taken involving any personal risk or without suitable training. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Put on appropriate personal protective equipment.

For emergency responders : If specialized clothing is required to deal with spillage, take note of any information in section 8 on suitable and unsuitable materials. See also the information in “For non-emergency personnel”.

Environmental precautions : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Methods and materials for containment and cleaning up

: Stop leak if without risk. Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

SECTION 7 – HANDLING AND STORAGE

Precautions for safe handling

Under no circumstances eat or drink while handling this material. Wash hands and face after working with material.

Conditions for safe storage, including any incompatibilities

: Store at room temperature (@15°-25° C) Protect from direct sunlight & moisture Keep container well closed. Keep away from children. Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

SECTION 8 – EXPOSURE CONTROL/PERSONAL PROTECTION

Appropriate engineering controls

: Good general ventilation should be sufficient to control worker exposure to airborne contaminants.

Environmental exposure controls

: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation.

Respiratory protection : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

Hygiene measures : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Hand Protection : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.

Eye protection : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.

SECTION 9 – PHYSICAL AND CHEMICAL PROPERTIES

Appearance

Physical state : Liquid [Aqueous solution]

Color : CLEAR

Odor : CITRUS

pH :

Relative density : Not available.

Specific Gravity :

Freezing Point : 32°F (0°C)

Solubility in water : Miscible in any proportion

Melting point : N/A

Boiling point : > 100° C

SECTION 10 – STABILITY AND REACTIVITY

Stability : Stable

Reactivity : Generate heat with mixed with acids. May react with ammonium salts resulting in ammonia gas. Flammable hydrogen gas may be generated upon contact with aluminum, tin, lead and zinc.

Chemical stability : The product is stable.

Conditions to avoid : No specific data.

Incompatible materials : Calcium and reactive or incompatible with the following materials: oxidizing materials.

Hazardous decomposition products

: Under normal conditions of storage and use, hazardous decomposition products should not be produced.

SECTION 11 – TOXICOLOGICAL INFORMATION

In case of ingestion : After ingestion of large amounts: nausea, vomiting, gastro-intestinal distress, abdominal discomfort may occur. Seek medical advice.

Further data : LD50 (oral-rat): N/A No evidence of carcinogenic properties. No evidence of mutagenic or teratogenic effects

SECTION 12 – ECOLOGICAL INFORMATION

No environmental hazard is anticipated provided that the material is handled and disposed of with due care and attention.

SECTION 13 – ECOLOGICAL INFORMATION

Disposal methods : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers

SECTION 14 – TRANSPORTATION INFORMATION

	DOT Classification	IMDG	IATA
UN number	Not regulated	Not regulated	Not regulated
UN proper shipping name	-	-	-
Transport hazard class(es)	-	-	-
Packing group	-	-	-
Environmental hazards	No	No	No
Additional information			

Special precautions user : Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

SECTION 15 – REGULATORY INFORMATION

Labeling according to EEC directives:

R-phrases :

S-phrases :

SECTION 16 – OTHER INFORMATION

History

Date if issue : 01/01/2021

Date of previous issue : 2019

Version : 1.2
